

SPEAKER 1- QUINLAN IWASAKA

You have presented very well on the topic- Surgeon and you got a 2nd rank. Your speech was well organized and your introduction to the topic was good. A surgeon's life is very hard, and each day they have to be in a situation of life and death. Your analysis of the topic was also great, as your examples were relevant and related to the topic, and through example, you have tried to showcase the character of a surgeon. One example was from an animation movie, i.e., Cars and the Invention of the iPhone, which reflects the quality of your content. However, you can do better with your delivery of the topic. To improve your delivery, I suggest you add some gestures. Overall, it was a great performance. Keep doing hard work like a surgeon. I wish you the best wishes for future events.

SPEAKER 2- MAGGIE DONG

Your topic is 'Waiter' and you got 6th rank. I found that your content was good, but your speech was not organized. Your introduction to the topic is not great. In your introduction, you have talked about how our lives will be affected if waiters are not there. You have given three examples, i.e., chair, body system, and technology. I did not find the first two examples as quality examples as they are very general in nature. Your last example was great and showcased your critical thinking. You have to work on the organization of speech and quality of speech.

SPEAKER 3- ETHAN WANG

Your topic is 'Market' and you got 7th rank. You need to work hard. Your introduction to the topic was good, but your concluding points were not up to par; they could be better. Your analysis of the topic was not well found, as the topic is market, and the examples you gave were not so relatable to the topic. I also found that your delivery is not so great; you can improve by adding some gestures and stressing some words. I wish you all the best for upcoming competitions.

SPEAKER 4- LUCAS NI

Your topic is "Juicer," and you got 4th rank. I found that your analysis of the topic was not so impressive, as you said that a juicer is something that conveys the meaning of the good thing found inside. Your examples were great and prove that you are good at critical thinking, but you have failed to relate them to the topic. Your delivery and your speaking skills were amazing. Your speech is also well organized. Just try to work on an analysis of the topic and relate it to examples.

SPEAKER 5- SHON KHISTI

You have performed exceptionally well on the topic- Neck and that's why you got 1st rank. Your delivery of the speech was impressive. I like your confidence. Your analysis of the topic is amazing, as your examples were so good. The best thing about your speech is the way you relate your examples to the topic. Many participants have failed to do that. Your examples show how good your content was. Your speech is well-organized and topic-oriented. There is one area where you can work, i.e., giving stress to some words. It would take your speech to another level. All the best for future events.

SPEAKER 6- RYAN LU

Your topic is 'Photographer' and you got 3rd rank. Your organization of speech is good. Your thinking about the topic is great. One should learn from their past and not repeat the same mistakes. You have supported your idea by giving examples of Hitler, Japan, and your classmates. Your examples are so good. Your speaking skills are very good. However, your introduction to the topic can be better, and your delivery of the speech can also be done in a better way by adding some voice modulation to your speech.

SPEAKER 7- ANNY DU

Your topic is cane and you got the 5th rank. You have good speaking skills but need to sharpen your organizing and analysis skills. You need a lot of improvement in your speech. First, you need to understand the topic, analyze it, and then demonstrate your understanding in the speech. In this speech, I did not find that you correctly chose, as you have talked about a revolution in Cane. First, you need to give a thorough definition or meaning of the topic.

Your examples were not so relevant, and it seems like all the examples are so similar. Your delivery was also not up to par, as sometimes you fumbled and took pauses.
