Emerson

Lauren: good stat re: less R+D (9 approved v. 31 currently). Diff to tackle diseases would get less attention - good pt.
Counterfeit drugs good pt as well. No eye contact in opening.
mispronounced "bureaucracy" Did a good job on pt. about price controls in '70s in U.S.

Sunny: people can't afford to take drugs they need - good pt. Good eye contact.
Opioid crisis - misuse of drugs is off-topic. Didn't drive it back to the point.
Insurance premiums - didn't tie it directly to argument either
*in cross you made the point that cure is too expensive but got lost in opening
in summary you tied it in better.

Eliza: good pt. re: generic shortages and R+D. Did a good job staying on point, refuting pts. opioid pt. - good that you brought up actual drug name
Good pacing, did a good job listening/refuting. Some argument were toward keeping pharma cos. making same amt of \$ and that isn't so strong. Good job on refuting opioid pt.

Ellie: good pt. re: Orphan Drug Act. Good ex. re: Hep C drug.
- Said price controls will benefit drug cos in long run but no basis provided
- Good pt. re: black mkt. Poised

David Roper
JUDGE'S SIGNATURE*ELAC*
JUDGE'S AFFILIATION*Good Job to both teams**Ass -> For many ppl economy = life (1930's)**Neg -> ~~the~~ ~~the~~**The shortage of Mds is too much
of a what is it*

~~NEG~~ NEG

• Need innovation to help.

↳ more people buying, less accessible (inflation due to shortage).

- price controls don't have a set price / amount.

- Die b/c they don't have the ones.

Don't have the money to do the ones.

- developing a drug is \$\$\$.

- set the prices high to make more.

- Most Americans use generic.

- Price controls will take time. will take many years to impose these controls.

~~- created a shortage.~~

• created a shortage.

↳ less access to other.

↳ won't have enough money to make more.

• Not sure abt the card.

- prot. plans = not save \$\$\$ anyong one time cost reduction.

- Wouldn't happen right away. prices will never be at equilibrium (but how?)

• Can't negotiate b/c of supply in demand.

• I see the argument being made but, wrongly stated.

↳ only enjoy 1 time cost reduction

↳ only 2% of health bill won't affect consumers that much.

→ time being taken to pass means that time isn't going into helping people.

~~NEG~~ AFF

• afford more brand drugs.

↳ price control a ~~the~~ time thing it wouldn't help much.

→ Never stated = not completely true.

↳ can be negotiable

- how innovation is hammed; money will be made less (basic logic)

- more people will buy, maybe even more b/c of an ↑ people purchasing if prices were affordable.

- Contradict in the statistics.

↳ Many can't afford.

• what is connecting?

↳ if drugs were in high demand, wouldn't there be money to make the drug

• Most Americans use generics; where's your evidence.

• Any evidence?

↳ never gave a card.

- A lot of Americans aren't accessible in general.

- Contradicting evidence.

- costs are so high

- Set limit = price control def.

• 20% or 50% would be too high or too low. There could be a compromised reach.

• After length amt. of time; even if it takes since it doesn't matter.
(Negative consequences?)

- the more people that need it will get it.

→ shortage wouldn't be much of a problem?

- delayed = better than not getting it at all

K. BalgELAC

JUDGE'S SIGNATURE

JUDGE'S AFFILIATION

NEG

- Fed govt shouldn't.
- more benefits from not increasing prices.
- Innovators will pursue res.
- premature mortality.
- 13 new drugs.
- reducing profits will limit new innovations/research.
- Pharm. companies will have to reduce budget (???)
- Costs for developing new drugs have increased.
- drug spending ↑ more than overall health care spending.
- take off 2% total.

AFF

- Price: reduce the prices.
- don't take meds? bc of high cost.
- don't take meds as prescribed; in order to save \$\$.
- people would take meds if med prices were ↓.
- 13.50 → \$150 / tablet
- sales benefit monopolies that are established
- don't have neg effects if implemented correct (theoretical)

JUDGE'S SIGNATURE

JUDGE'S AFFILIATION

- (-)
1. Good start to debate, a little quiet at first ~~but~~ but that was not a problem later on.
 2. Great use of moving debate back on track. Very good at delivering evidence.

- (+)
1. Good use of evidence credibility and use of contingency that "whoever best benefits citizens wins debate"
 2. Good delivery of evidence. Sometimes sounded a little unsure at times.

R.F.D.

most of affirmation arguments were centered around evidence in the end. Negation moved it back and even cited how affirmation also used "outdated or non-credible evidence."

Neg

- Fill the criterion } ways to lose
- Prove that the aff. savers more lives
- Don't feel like they have to prove how many can't afford the medication

Opinion
 ↳ deals w/ the pharma industry
 ↳ does not deal w/ price controls

↳ Aff - prices are safe

↓
 increases prices therefore not saving lives

• Federal Budget

4.5 million jobs

Federal regulations merge prices

Imp. 60 Billion \$ lost due to P.C

P4 P.C lose investors
 ↳ low profit

↳ low investment = loss of investors

↳ lives are safe w/o price controls

• Billion dollar comp.

will not settle for less money

2nd contention: Price controls causes higher drug

• Companies can't make as much money as before due to 10% profit

Pre time 11:00

Generic drugs are currency competing against each other because they are a cheap alt.

Money is being used to buy back P.C will prevent from funding that

Unsettling: Federal regulations

2nd 71, 728 2018

Drug shortages: Because of P.C

3rd response? Shortages don't occur because nobody can't afford

2:00

1.5 million jobs are saved

no resistance in industry

Architects

trying to make sure that all drugs are cheap

Excluded. art. 2. Grouped with drugs

Enforce P.C since 1984

Pos

• Prices are useless

↳ P.C useless

- already cheap

Jobs

• 5.4m lost due to price controls

• Stressed price decreases

↳ Gov. prices must go up

Prep time: 32 sec

going over No case

1. innovations

• Prescription

\$1.19 30 turn marketing

• don't need

• buying back their own stocks

• Product 2018

• Drugs 2011

5th: innovation and prices are not connected

2nd contention: P.C reduces (wings) ↳ shots 1000/mont

P.C reduce prices: saving lives

Shortages: supply & demand do not show in

and: open market industry: show the econ. is different every where

optimal: lower cost best way to save lives 71k people died in 2017

5th: res. innovation

- P.C have no affect on innovation

- Prices 2018 P.C increase demand

3rd response to 3rd point:

Not unique due to no shortages because nobody is buying it because it's so expensive

Mixed 2nd point

not use any health American P.C in order to raise prices?

Medication: more expensive } why? - not true } price

Irrelevant Canadian Error

Shortages because there are being

↳ open no shortages because just expensive

invented generic drugs by prescriptive drugs are not putting investment in

Enforce P.C since 1984

JUDGE'S AFFILIATION

Neg Notes:

4:00

- Lives are saved &
- Price control stifles innovation
- No new drugs will be created
- 60 Billion and million
- Lives & jobs are being lost
- Lost due to price controls
- P.C. useless because they are already cheap
- Work out w/ cheap prices
- Sub B: PC can make things more expensive
- Need to make up for losses
- Jan. 2018 pg for medication increase prices & reduce
- Taxes are raised on the citizens

Aff Notes:

- Saving lives is irreversible
- Opponent's death has gone up
- 1K / month
- Breathing
- Finding comes out of pocket
- People given opiates
- Can't afford other
- Higher for states w/ high poverty levels
- Americans lose 107 million dollars
- Prediction abandonment
- Skin prescription
- Close money
- die
- 23% for scholars
- \$252 infirmity alone
- Higher dropout rates
- Prices lower, the quality of life
- 125,000 deaths
- Hospitalization
- 1 billion / year
