

2023 IPDA NATIONAL CHAMPIONSHIP TOURNAMENT & CONVENTION

HOW TO CONNECT TO THE BRONCO-GUEST WIRELESS NETWORK

Bronco-Guest is not a secure wireless network and is intended for short-term internet access for guests and friends of the University.

- The Bronco-Guest wireless network requires you to provide a name and verify a valid email address and phone number.
 - Turn on your device's wireless network function and connect to a **Bronco-Guest** wireless access point.

Windows: Click on the Wireless Network Connection icon in the System Tray at the lower-right of your computer desktop, then left-click on the Bronco-Guest network. Click the Connect button.

Mac: Click the AirPort (wireless) icon at the top-right on the screen and choose Bronco-Guest from the list of available wireless networks.

Smartphones/Tablets: Open your device's wireless network settings and choose Bronco-Guest from the list of available wireless networks.
- When presented with the login screen, select **Click Here to Self Register for Account** (or, if you have already received credentials, enter them where indicated).
- Create your account by entering your name, preferred email address, and phone number. Select **Register**.
- This next page displays your account information. Choose **Email Me** or **Text Me** to receive your Bronco-Guest username and password.
- Once you receive your login credentials by email or text, select **Sign On** to access the login screen and enter your Guest Username and Guest Password. **Note: You must read and agree to the terms and conditions on the Sign On page before you can sign in to Bronco-Guest.**
- Select **Sign On**.
- Your registration will be valid for 7 days. After that time, you will need to re-register.
